- Offers 16 reasons ....
  - They were opposed to four to eight more years of what they saw as the progressive politics of Barack Obama as reflected by Hillary Clinton's swing further to the left in response to Bernie Sander's primary challenge.
  - Perception of weak border enforcement.
  - The unwillingness of the Obama administration to call radical Islamic terrorism by its name.
  - Objection to President Obama and Justice Department officials putting their fingers on the scales of justice when racial incidents were involved.

FILKO**

- Concern about the IRS discriminating against TEA Party and other conservative groups.
- Great concern about liberal judges and justices appointed to the federal judiciary, particularly the Supreme Court.
- Anxiety about the declining percentage of GNP dedicated to the military, and concern about reports of declining military readiness.
- Distress about the left-leaning political indoctrination, and suppression of free speech, running rampant on college campuses and in public schools.
- Resentment toward the condescension exhibited by Barack Obama when describing people in the heartland as clinging to their guns and Bibles and distrust of people unlike themselves.
- Hillary Clinton's use of the term "deplorables" was a deal breaker.

- Complete distrust of Hillary Clinton. Perceived her as a phony, with no acceptance of her explanations with respect to either Benghazi or the much-disputed emails.
- Concern about the national debt, believing that Clinton would only make the situation worse.
- Expecting Clinton to win, they wanted to minimize her margin of victory and thus be unable to claim a large political mandate.
- Perception of universal health care as a budget buster.
- General opposition to what they perceived as an ever-increasing size, scope and power of the federal government.
- Trump was seen as a successful businessman, and it was thought that he could run the administration in a business-like manner.

# JOSEPH B. FILKO

Concludes ....

*these people do not represent a basket of deplorables. For most of them, expecting him to lose, this was a protest vote. Many came from the professions, from the military or from government service. These are well-informed and patriotic Americans who were desperate for a change, even if it meant rolling the dice, in some cases against their better judgment.*
